About FALL PLANTING

Plant all perennial flowers in the fall just as you would in the spring. Do not mound dirt over them but be sure and mulch them after the ground freezes. Put good mulch over your bulb bed, using coarse litter or straw manure. Put a mound of dirt around your bramble fruits as soon as they are planted and remove this mound early next spring after growth starts.

You can fall plant as long as you can work the ground. Be sure you water thoroughly if dry, and do not expect most fall-planted stock to show any signs of growth this season as it has gone into a dormant period and will not start until next spring.

FREE GIFT with Every Order

With every nursery order we receive, it is our custom and pleasure to include with your order a valuable free gift. You will be surprised and pleased when you receive it, and it's our way of saying "thank you" for the fine order.

ORIENTAL POPPIES

All these Poppies are varieties that have very large flowers of bold, brilliant colors. They have an exciting beauty entirely different from any other flower.

The Oriental Poppy roots should be planted in late summer and early fall. They then will bloom well the following spring. Live for years.

HYACINTHS (ILLUSTRATED AT RIGHT)

Extra Hardy—Easy to Grow—Fragrant

Like Daffodils, Hyacinths are very hardy and easy to grow, requiring very little attention. In fact, they are very good planted with Daffodils. But unlike Daffodils, they usually are planted more formally—in rows or beds—although they may be handled informally. They usually get about 12" high, and are especially good as a front for tulips, or may be combined with the lower-growing flowers such as Grape Hyacinth or Pansies. Hyacinths like a rich, well-drained soil and are best planted about 6" deep and 6 to 9" apart.

Hyacinths also are a favorite for indoor forcing. Special glasses are made for this purpose, but a glass or jar will do. Just place the bulb on the top rim of the glass or jar and fill the jar with water until it touches the root base. Keep in a cool, dark place, adding water (but not changing it) as necessary. When the bulb gets about 4 inches of top growth (this usually takes about 8 weeks) place in a north window and they will bloom beautifully. This forcing should be started in mid-winter—December, January or early February.

RED, WHITE and BLUE COLLECTION

B6502—BISMARK. (See 1) A light sky-blue with broad well-formed spikes on strong stems. Excellent for early forcing too.

B6522—L'INNOCENCE. (See 2) This is the best and most popular white Hyacinth. Has broad, well-shaped bells that are pure white. Blooms early.

B6530—PINK PEARL. (See 3) A lovely bright pink—really a rose-pink with lighter edges. Has a large spike of fine bells.

B6518—KING OF THE BLUES. (See 4) Deep glossy blue with well-formed large spike. A real beauty that everyone likes.

B6504—CITY OF HAARLEM. (See 5) The best yellow Hyacinth. Has well-formed trusses of golden yellow flowers.

B6520—LA VICTOIRE (See 6) A brilliant carmine-rose that blooms very early. Has large, well-filled spikes. A very showy variety ideal for adding bright color to your garden.

Gurney's DAFFODILS

FOR RARE BEAUTY

If you want to be sure of blooms, and want a showing as good as any professional's, plant Daffodils. They are sure to grow in spite of adversity, never giving any trouble, and each spring they produce healthy, gay and colorful blooms. You can depend upon them.

Do not try to achieve formal effects. Don't put them in straight rows or squared beds. They look best along the edge of the shrubbery, or strewn across the lawn. Lots of people plant Daffodils by taking the bulbs in handfuls and scattering them rather carelessly across the lawn or a grassy slope. Then plant the bulbs 5 inches deep wherever they fall. They come up then as a natural part of the landscape.

To keep blooming year after year, dig up about every third year separate and plant again. Do this in July or early August.

IMPORTED FROM HOLLAND

We chose the following Daffodils because they are some of the best for a range of colors, shapes and sizes. All imported by us, for you, from Holland.

Very Finest Named Varieties

Look over the illustrations at the right and you will find some of the very finest Daffodils money can buy. The pictures do not begin to do them justice but as you can see, they are all real beauties and will add lots of color to your planting.

KING ALFRED (See 1)

B6610—Probably the most popular of all Daffodils, and certainly one of the best. Make a golden yellow flower 4 to 5 inches across with a trumpet 2 inches long. Very good for forcing too. 3 for 50c; 6 for 85c; 12 for 1.49, postpaid.

FORTUNE (See 2)

SPRING FLOWERING BULBS from HOLLAND

ILLUSTRATED AT RIGHT

B6806—GLORY OF SNOW (Chionodoxa). These bloom very early (with the crocus) and produce short stalks with many flowers to a stem. The flowers are a sky-blue with a center of white. Plant 3 inches deep with about 18 bulbs to a square foot in a fairly sunny location. Can't be beat for mass plantings. Locate the bed where they will be undisturbed for a number of years. 6 for 35c; 12 for 59c; 25 for 1.10; 100 for 3.98, postpaid.

SCILLA SIBIRICA (Siberian Squill)

B6822—This is one of the earliest of all to flower. Has dainty bright blue flowers that are ideal for the border or rock garden. The beautiful bell-like flowers are produced on stems 3 to 4 inches high. Plant 3 inches deep in most any location. 12 for 65c; 25 for 1.19; 50 for 2.19; 100 for 3.98, postpaid.

Plant them out in front where they can be seen. Ideal for low borders or edging beds. Use among shrubs and perennials. While they like plenty of sun they do well under trees and shrubs. If undisturbed they should last for years. Grows 6 inches tall. 12 for 45c; 25 for 75c; 50 for 1.25; 100 for 1.95, postpaid.

GIANT CROCUS

They Bloom through the Melting Snows

Crocus are a colorful delight every spring because they come up and bloom with the melting snowdrifts and are so welcome after the long winter months. They are first to bloom each spring. Yes, you can grow them among the shrubbery, or right out in the open lawn. Good in corners, or rock gardens, too. Very easy to grow. These are the giant-flowering kind, and Holland grown:

TRY IT YOURSELF!

A GURNEY LAWN IS EASY TO MAKE

Preparation of the ground is important. First, plow or spade deeply. Level off the area to be planted and rake to remove sticks, trash, stones, or lumps.

After raking smooth—Roll the lawn thoroughly. This allows you to plant the seed more evenly, plus providing a firmer seed bed.

After rolling—Sow the seed, generally

using 1 lb. of lawn seed to every 225 sq. feet.

After seeding—Rake carefully to work the seed slightly into the soil.

After this raking—Roll your lawn, using a roller or packer. This is important.

Keep it well watered (each day) for the next 2 or 3 weeks. Moisture is necessary for proper germination.

Gurney's Northern Grown LAWN SEED

FALL SEED FOR A WEED-FREE LAWN

By seeding in August or September you eliminate a good share of your weeds. You'll have an established lawn by the time the snow flies. The weed crop in the spring won't be able to take over.

Our Blue Grass is absolutely "tops" in quality—northern-grown seed. Remember to seed early in the fall for best results.

Always the Best For Less at Gurney's

You cannot buy finer grass seed than we are offering here at Gurney's. All of it is fresh, new crop seed that has been carefully tested to assure you of a beautiful lawn. It is good heavy seed and that means top quality, high germinating seed. You get the best—for less—when you order from Gurney's.

Gorgeous New HYBRID LILIES

The three lilies described below are the result of over 20 years of hybridizing by Mr. Carlton Yerex of Oregon. Lily experts already recognize them as three of the world's best and most beautiful strains.

B5000—AURELIAN HYBRID. These are wide, flaring trumpet lilies six inches and more across in beautiful color combinations, including sunburst effects. Tall, sturdy plants are very easy to grow; live a long time; are entirely hardy. Plant 6" deep. 1.69 each; 3 for 4.98, postpaid.

B5024—PINK TRUMPET. Long trumpet lilies that actually are a beautiful shell pink. Also very hardy and easy to grow but the lilies are apt to fade in hot, direct sunlight so give best results in partial shade. Or screen some at time of blooming. Plant 6" deep. 2.75, postpaid.

B5035—YELLOW TRUMPET. From the same seedling strain as the spike of blooms that won the Griffith Cup and Sweepstakes Award at the 1950 National Lily Show, and "Award of Merit" at the 1951 show. Grows much like Regal, but in beautiful shades of clear yellow and apricot, with stronger stems and larger flowers. 2.00 each; 3 for 5.98, postpaid.

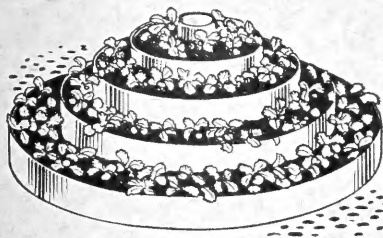

Now You Can FALL PLANT STRAWBERRIES from Gurney's

Plant in September

Yes, due to modern storage facilities, it is now possible to fall plant strawberries successfully. We have found that spring dug plants put in cold storage stay in perfect dormant condition for a successful planting the following fall.

You will receive your plants in polyethylene bags without any packing whatsoever. This packing method has been carefully tested by several of the larger state colleges and found to be absolutely successful.

This is Important: Make certain you mulch your planting with about 6 inches of coarse straw or litter at freezing time. Uncover when growth starts in the spring.
